

## **OPERATING INSTRUCTIONS - CATALOG NO. 301 SOCKET SAFETY CLIPS**

### **Directions**

With the meter removed from the socket, attach the Socket Safety Clip around the jaws of a meter socket (See Figure 1). It is recommended to install the Socket Safety Clip to each jaw, regardless of the quantity of failed jaws per socket.

### **Results**

After installing the Socket Safety Clip, a meter socket jaw improves the holding force to close to 20 lbs. per socket jaw.

**NOTE:** TESCO Socket Safety Clips are a temporary solution, and are intended for one-time-use only.
